

Tissue Services

The organizational structure of BioTransplant.org provides greater collaboration between the business units, and allows us to maintain our focus on saving and enhancing lives. Support services such as human resources, corporate communications, financial services, and others will operate under the name.

BioTransplant.org focuses on regenerative medicine. It encompasses marrow donor services, tissue services, peripheral stem cell collection, cord blood cellular therapy programs and all aspects of regenerative research. BioTransplant.org collaborates with medical institutions around the world.

- **The Blood and Tissue Center Foundation** is dedicated to raising awareness of the important achievements of this organization and reminding the community that it is critical to provide financial support so that the Blood and Tissue Center may continue to make breakthroughs in lifesaving research and services.

BioTransplant.org provides facilities and expertise for established clinical services and research programs. The company specializes in the development and manufacturing of cellular and tissue components for clinical use under the rigorous SOPs and GMP required for human medical use. The laboratories provide state-of-the-art testing as well as assay development.

BioTransplant.org is both a direct supplier to healthcare providers and a partner with commercial and non-profit organizations providing regenerative medicine treatments to patients. Our collections, processing and laboratory facilities include ISO-classified clean rooms, processing facilities, and testing laboratories that meet international regulatory standards.

BioTransplant.org encompasses a full service tissue bank, a peripheral blood stem cell program, and a cord blood bank.

Our collections, processing and laboratory facilities include ISO-classified clean rooms, processing facilities, and testing laboratories that meet international regulatory standards.

BioTransplant.org encompasses a full service tissue bank, a peripheral blood stem cell program, and a cord blood bank.

Operating as the only AATB accredited full service tissue program in Texas, the BioTransplant.org maintains an extremely high level of quality in allografts and services.

It ensures that the safest and most precise allografts are available to the physicians and patients in the communities we serve.

- Marrow services provide a source for bone marrow components, including peripheral blood stem cells, used in transplant therapies for patients with life-threatening blood disorders.
- The cord blood bank is a source of ethnically diverse, life-saving umbilical cord blood, collected from the placenta which is donated after a baby is born.

Service History

Since 2000, BioTransplant.org, has served the needs of patients with the life-enhancing gift of donated human tissue for transplant.

The BioTransplant.org is the only full service tissue bank in Texas accredited by the American Association of Tissue Banks (AATB). Our team of dedicated professionals has unmatched experience and knowledge in developing, implementing and maintaining the highest standards of service and quality for the communities and professionals we serve.

Quality Culture

BioTransplant.org monitors and ensures that all surgical activity follows the Current Good Tissue Practices (cGTP) set forth by the FDA and all other applicable standards. These cGTPs ensure that our primary goal is met — the safety of your patients and staff.

- All donors undergo a rigorous medical evaluation, in addition to serology and microbiology testing.
- Our state-of-the-art clean rooms were built to minimize the risk of contamination during processing.
- Our technicians engineer specialty grafts using high quality processes, thereby

creating products that surgeons can use while maintaining biomechanical integrity and safety.

Customer Service

The BioTransplant.org's around-the-clock distribution team guarantees that your surgeons and facilities will always have the grafts they need, when they need them. Our on-call specialists are available 365 days a year offering unsurpassed customer service.

Accreditations & Licensure

Consignment Availability

BioTransplant.org's consignment program promotes good stewardship of tissue resources and allows partnering facilities to control the costs associated with unnecessary waste and storage.

Collaborative Partnerships

Through BioTransplant.org, the Tissue Center currently provides tissue components to research and development partners that include:

BioTransplant.org

- INCELL Corporation – BioTransplant.org provides cadaveric tissue to this human stem cell therapy company.
- Scripps Research Institute – BioTransplant.org provides cartilage for arthritis-related research.
- University of Texas Health Science Center at San Antonio – BioTransplant.org provides tissue for cardiology research.

Our Employees' Commitment to the Community

Employees at BioTransplant.org not only serve the community through their regular jobs, but also take on many worthwhile causes throughout the year. By joining hands with the communities in which they live, employees have multiplied their ability to positively impact area needs.

BioTransplant.org employees actively engage in projects such as gathering supplies for animal shelters, hosting food drives, constructing homes, purchasing school supplies, collecting items for the homeless shelter and many others. The compassion of our employees extends to support other nonprofits such as United Way, Leukemia & Lymphoma Society, Aplastic Anemia & MDS International, Susan G. Komen, and many others.

All these activities demonstrate commitment to our core values: Respect, integrity and excellence.
